

Client: George Houlton & Sons Ltd

Programme: 18 weeks

Value: £57,000

Client's Requirements

George Houlton & Sons Ltd required a trusted & reliable sub-contractor to deliver the Labour & Plant Groundworks package to the new Goals Soccer Centre in Hull. The works were carried out on a brownfield site on the Bankside Industrial Estate on remediated ground.

Delivery

The works were mainly carried out in winter & problems were encountered during the heavy snowfall towards the end of 2010, but with a flexible approach to working we were able to work with the Houlton site team to overcome this pressure on the works programme.

Yorkshire Groundworks Contribution

Our Groundworks package included:-

- Foundations** Ringbeam constructed around driven pre-cast piling
- Drainage** All FW & SW drainage installed up to 2m deep & construction of Premavoid dispersal soakaway.
- Services** Electricity, Comms & Water services installed.
- Externals** 550m of kerbing installed to car park also sub-base formed, ramp & steps with paving also installed around building.

Client Feedback

Good communication & teamwork with the Houlton site team enabled us to deliver this project on programme despite the adverse weather setting us back at the start of the project.
