

Wind Farm Entrance

Skerne, East Yorkshire

Client: Harmony Energy

Programme: 1 Weeks

Value: £17,500

Client's Requirements

Harmony Energy required a contractor to construct a new vehicular entrance to a new wind farm development on an existing public road including removal of hedging, excavations & preparing sub-base & tarmac.

Delivery

As the main contractor on site we managed the traffic management on the project, keeping the road open to the public. The project was actually completed in less than one week.

Yorkshire Groundworks Contribution

Our package included removal of hedges & grass/topsoil, excavation to formation, stoning up & compaction to underside of tarmac, tarmac surfacing to highways specification.

Project Outcome

The project was delivered on programme to meet the strict deadlines set by the client so he could utilise the new warehousing space to grow his business.
